

Amendments to the Claims: This listing of claims will replace all prior versions, and listings, of claims in the application

Listing of Claims:

1-2. (Cancelled)

3. (Original) A vacuum cleaner comprising:

a blower;

a rotary brush for sweeping a dust particle;

a belt for transmitting a driving force from said blower or other motor to said rotary brush; and

a belt compartment accommodating said belt, being used as an exhaust passage for passing exhaust from said blower.

4. (Original) A vacuum cleaner comprising:

a nozzle section;

a handle coupled to said nozzle section;

a blower;

a dust collection box unit, said blower and said dust collection box unit being working elements; and

a rotary brush for sweeping a dust particle, being accommodated in said nozzle section,

wherein said dust collection unit is detachably disposed at an opening provided at a side of said nozzle section.

5. (Original) The vacuum cleaner of claim 4,

wherein said nozzle section includes a case including a lower unit and an upper unit,

wherein said dust collection box unit includes:

a dust collection box; and

a filter unit detachably fitting to said dust collection box,

wherein a window is formed on a top of said nozzle section for covering said dust collection box unit, and

wherein said dust collection box unit is inserted in a space enclosed by said window and said lower unit or by said window and said upper unit.

6-11. (Cancelled)

12. (Original) A vacuum cleaner comprising:

a nozzle section crawling on a floor;

a blower;

a rotary brush for sweeping a dust particle;

a dust collection unit including:

a dust collection box; and

a filter unit detachably fitting to said dust collection box;

a belt for transmitting rotation of said blower to said rotary brush, being disposed in said nozzle section; and

a grip provided at a side of said dust collection box, said side being opposite to said belt

13. (Original) A vacuum cleaner comprising:

a nozzle section crawling on a floor;

a blower;

a rotary brush for sweeping a dust particle;

a dust collection box unit including:

a dust collection box having a grip at a side thereof; and

a filter unit detachably fitting to said dust collection box; and

a belt for transmitting rotation of said blower to said rotary brush, being disposed in said nozzle section,

wherein said dust collection box unit is freely drawn out of and put in an opening provided at a side of said nozzle section, and

wherein said grip of said dust collection box is shaped along an appearance shape.

14-15. (Cancelled)

16. (Currently Amended) A vacuum cleaner comprising:

a cleaner main body including a charge terminal connection unit; and

a charger including:

separate boxes;

a coupling plane coupling said separate boxes; ~~and~~

a charger terminal unit provided on said coupling plane,

wherein said cleaner main body is mounted on said coupling plane;

a power source transformer disposed in one of said separate boxes; and

a printed circuit board disposed in another of said separate boxes.

17. (Original) The vacuum cleaner of claim 16, wherein a forward bottom of said cleaner main body touches down on a floor when said cleaner main body is mounted on said charger.

18. (Cancelled)

19. (Cancelled)
